

Graphic Design / Web Design

About Swweb Development:

Swweb Development is a creative interactive agency with offices in the US and Europe. We specialize in the design and development of Mobile Apps and Websites.

Our mission is to build more profitable relationships between our clients and their customers or supporters, and to create connections with consumers and audiences that drive results. We plan, create, manage and measure business and nonprofit communications that optimize how our clients acquire and retain their customers and supporters.

Job Description:

We're searching for creative part-time student interns with a passion for ideas that bring brands to life through digital channels. We are looking for a visual designer who has strong conceptual skills and experience designing for the web and/or mobile platforms. Interns will work under the guidance of our creative director and lead designer to produce design concepts and incorporate client feedback into distinct and functional mobile and web solutions.

Desired Skills:

- Working knowledge of Photoshop, Illustrator, HTML, and Dreamweaver
- Strong teamwork and communication skills
- Innovative and emotional story-telling abilities
- Ability to work with cross discipline team members to help deliver and integrate creative/technical/information architecture solutions
- Strong typography, image creation, layout skills a must
- Keen eye for details and high execution standards
- Mobile design experience a plus
